Iman Warsame

Copenhagen, Denmark | +45 91 11 31 40 | iwarsame38@gmail.com | warsame.dev | LinkedIn

Technical Product Lead, full-stack engineer and Chartered Civil Engineer with a track record of taking products from zero to one. Combines deep hands-on engineering with product strategy, commercial ownership and stakeholder management. Experienced in building and leading cross-functional teams, owning budgets and roadmaps, and shipping software that solves real problems in complex, regulated industries.

EXPERIENCE

Ramboll

Sep 2019 – Present

Technical Product Lead

Jun 2025 – Present

Copenhagen, Denmark

- Led the technical and product development of a portfolio of asset management products in transport infrastructure: **AirPave** (Airport Pavement Management System), **Piksi** and **Raptor Web** (road survey data post-processing), **SMART** (asset management for ports and bridges) and **RIMS** (contractor management for municipal maintenance)
- Owned end-to-end product strategy: stakeholder discovery, Amazon-style press releases, investment cases, budgets and roadmap prioritisation using working-backwards methodologies
- Architected and built AirPave with React, TypeScript, Mantine, ASP.NET Core, Entity Framework, SQL and Mapbox; secured via Entra ID and deployed through Azure Pipelines with Vitest and xUnit
- Conducted on-site validation using Gemba principles, testing products in live operational environments to ensure they met real-world needs

Senior Engineer

Jun 2023 – Jun 2025

Southampton, England / Copenhagen, Denmark

- Led delivery of a **3D decking configurator** built with Three.js and React with an ASP.NET Core backend; managed client communications and technical requirements
- Led delivery of a **data-driven infrastructure design platform** across multiple geographies, built with React, TypeScript, MUI, React Three Fibre and Speckle for 3D visualisation, backed by MongoDB and ASP.NET Core
- Developed a **project intelligence platform** using React with ASP.NET Web API and MongoDB, deployed via Azure Web Services with CI/CD pipelines
- Led development of **LEAP**, a web-based tool for cost-benefit analyses centred around liveability and place indicators; led a team, owned client requirements, communications and management; features included a project timeline with automatic snapshots on each change, and advanced analyses including sensitivity and tipping point analyses
- Line managed and mentored junior engineers, supporting career growth and building high-performing team culture

Ramboll (continued)

Engineer
Jun 2021 – Jun 2023

Southampton, England

- Assistant project manager on **HS2 Cat 3 checks** (£72bn–98bn national programme), managing over £3m of engineering work
- Led development of an **automated retaining wall design tool**: managed a team of three developers plus budget and planning; integrated with PLAXIS via Python; built the front end with Avalonia using MVVM and abstract factory patterns
- Led an international team of six (US, Germany, Norway, India) to create design guidelines for temporary footbridges for **Bridges to Prosperity**
- Led a communications team promoting digital innovation and best practices across the UK Transport Division through regular webinars and internal campaigns
- Created automation tools for repetitive tasks in LUSAS and MIDAS structural analysis software

Graduate Engineer
Sep 2019 – Jun 2021

Southampton, England

- Contributed to a suite of software automating **motorway gantry design and analysis**
- Built an **automated base plate designer** for motorway gantries

TECHNICAL SKILLS

TypeScript | JavaScript | React | Next.js | Three.js | Node.js | C# | ASP.NET Core | Python | Entity Framework | SQL & MongoDB | Azure | WPF / Avalonia | Figma & UX Design | CI/CD Pipelines

EDUCATION

MEng Civil Engineering
2015 – 2019

University of Southampton

Designed and built a 1 kW water wheel to irrigate farmland in remote areas using supercritical flow.

A Levels: Maths, Further Maths, Physics, Product Design
2008 – 2015

Ruislip High School

QUALIFICATIONS & AWARDS

Chartered Civil Engineer (CEng MICE)
2023

Institution of Civil Engineers

Digital Rising Star Award
2023

New Civil Engineer TechFest Awards

FA Level One Coaching Badge
2023

The Football Association

Danish Language, Module 4 (PD3)
In progress

Dansk uddannelse
